

# SEMI-FINISHED SEAT TRACKS

## Preferred provider of Seat Track Services.

KLX provides the full range of services to meet your seat track needs. By partnering with KLX, you no longer need to procure and stock multiple part numbers. You also eliminate the need to coordinate internal processes like machining and surface treatment.

KLX's seat track services include:

- Machining of seat mounting holes according to Airbus SRM
- Surface treatment (anodizing and painting) of final machined seat track segment

In addition, KLX is your source for consumables materials such as coatings, primers, and paints for cut-out edges.

Semi-Finished Seat Track	Semi-Finished Seat Track	Aircraft Type
