

MACHINED PARTS & ENGINEERED ITEMS

BRINGING STRUCTURE TO YOUR NEEDS

KLX Aerospace Solutions' specialized machined parts team will help you source your required OEM and PMA print controlled parts. We provide solutions for customers in the commercial, domestic and foreign military and business jet markets to support their production OEM and aftermarket needs.

By partnering with our customers to select the proper certified vendor, KLX® ensures each machined part is in conformance with all quality requirements. Whether it's a small bracket or valve or a large full empennage section - or anything in between - KLX will find the right manufacturer for you.

KLX provides machined parts from over 100 manufacturers, including:

- Brackets
 - Struts
 - Flaps
 - Doors
 - Frames
 - Bulkheads
 - Aircraft Skins
 - Sensors
 - Mounts
 - Strakes
 - Leading edge components
 - Support Beams
 - Doublers
 - Non-repairable assemblies
- And hundreds more!

The products we provide can be incorporated into Min/Max, VMI, Web Portal and kitting solutions to minimize costs and improve turnaround time rates.

Contact your local KLX Aerospace Solutions representative to support all of your machined parts and print controlled product needs.
